

PERSONALIZATION FILTER DOCUMENTATION

Summary

The personalization filter is a plugin that filters text and replaces it with user-specific information. This will allow administrators and instructors to enter personalized text into courses.

For example:

Hello {USER_FIRSTNAME}! Welcome to {COURSE_FULLNAME}!

This course starts on {COURSE_STARTDATE}.

After the course ends, your grade will be sent to {USER_MANAGER}.

Would become:

Hello Bob! Welcome to Moodle development 101!

This course starts on November 1st, 2016.

After the course ends, your grade will be sent to John Smith.

Fields

The following tables list available fields. Fields will be entered using the upper-case value in the first column, surrounded by curly-brackets. Ex. {USER_USERNAME}.

User Fields

These fields apply to the user viewing the page.
